DETAILED ACTION

Remarks

1. The indicated allowability of claim 4 is withdrawn. Applicant amended the claim 4 so as to change a scope of the limitation.

Drawings

2. The drawings were received on June 20, 2003. These drawings are acceptable.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 4 is rejected under 35 U.S.C. 102(e) as being anticipated by Ishinaga (US 2002/0134988).

Ishinaga teaches a light-emitting device comprising (Fig.2):

a light-emitting element (12); a case (20) including a cup-like portion having a bottom on which said light-emitting element is mounted; a sealing member (24) with which said cup-like portion is filled so that said light-emitting element is covered with said sealing member; and a gap layer (26) having a lower refractive index formed between said sealing member and a surface of said case shaping a side surface of said

Art Unit: 2811

cup-like portion, wherein said sealing member adheres to said bottom of said cup-like portion.

Ishinaga does not expressly teach the gap layer having a refractive index lower than that of said sealing member. However, this feature is inherent because sealing member 24 of Ishinaga and sealing member 40 of this invention both comprise an epoxy resin material.

Allowable Subject Matter

5. Claims 1, 5-6, 8-10, 14 & 16-21 are allowed.

Response to Arguments

6. Applicant's arguments with respect to claim 4 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
